

Knürr CiCon®
*Modular consoles for every room concept –
plan-friendly, economical und ergonomic*

Knürr CiCon®

The Circular Console

With momentum into a new, modern, current requirements-oriented spatial concept: On the basis of just **three basic modules**, Knürr the CiCon® offers a perfected room layout.

- The **Knürr CiCon®** is
- ... planning-friendly because of its transparent number of structural elements
 - ... flexible with future rearrangements through its modular design
 - ... economical and costs-transparent through clearly defined modules
 - ... ergonomically perfected through its optimum "see and reach" area

Arranged as standard individual module or as part of an "environment", the Knürr CiCon® creates the optimum preconditions for a perfect process flow, in a control/monitoring centre, for example.

Perfect Planning

Three basic modules

Planning reliability through modular construction

Easy and rapid integration of the most varied operations-related components. The Knürr CiCon® modular design makes it highly flexible, and its extrusion technology makes it extremely robust. Easy-on-the-eye and durable surfaces provide the perfect finish to the concept.

Knürr CiCon® Strong points

CIC20059

2 CIC20057

3 CIC20060

1 Ergonomics

The circular arrangement of the modules provides an optimum “see and reach” area. A workstation that is ergonomically set up with Knürr CiCon® counteracts tension in the head and neck muscles.

A comfortable, ergonomic sitting position requires sufficient leg space. Knürr CiCon® modules guarantee leg space with full stability.

1 ELI20022

2 Continuous worktop surfaces

In the link-up area the connector elements are hidden in the worktop, consequently providing a continuous worktop area.

3 Monitor integration

Quick and easy installation of TFT monitors; all trade-standard sizes in one or two levels.

Flexible mounting of flat screen monitors using multifunctional rails.

3 CIC20031

Knürr CiCon® Starke Argumente

4 Flexible equipment access

Knürr CiCon® enables easy installation through removable front and rear covers. It can also be “locked up” on request. The technical pedestal (D: 320 mm) offers the option of integrating computers, 19” elements and mounting panels for non-standard components.

5 Cable routing

Separate horizontal and vertical cable routing with cable basket trays and cable routing rings simplifies the cabling in the Knürr CiCon® modules. Easy and dust-protected cable entry with brush strips over the entire desk width.

Note:

A special connecting element is required with S-shape configurations and configurations running in opposing directions.

Get in touch with us – We provide expert support with every kind of planning.

Knürr CiCon® Module 1 22.5°

- Work level with full-cover worktop
- Knürr CiCon frame with integrated front and rear panel mounting
- Technical pedestal accessible from front and rear
- Cable routing possible from above in the cable duct across the entire desk width
- Dust protection in the cable routing area with brush strip
- The technical pedestal is open on the side with link-up for horizontal cabling
- Full front and rear cover can be removed from the technical pedestal
- Technical bottom cover with cable entry, diameter 80 mm
- Technical bottom cover prepared for 19" frame mounting
- With side panels
- Prepared for fitting a socket strip

Load rating
1500 N (static surface load)

Standards
- DIN 68761 for worktop
- EN 438 HGS class for coating material

Material / Finish

- Desk legs, extruded aluminium, powder-coated texture
- Worktop: three layer particle board, FP/Y E1 version, fire protection class B2
- Worktop coating: high pressure plastic laminate
- Side panels, front and rear covers: three layer particle board, FP/Y E1 version, directly coated, fire protection class B2
- CiCon desk frame: sheet steel, zinc passivated
- Technical bottom cover, powder-coated texture

Colour

- Legs: RAL 5008 grey blue
- Worktop, side panel, front and rear covers: light-grey
- Technical bottom cover, RAL 9011 graphite black

Supply schedule

- 1 CiCon work level with brush strip
- 1 CiCon desk frame

Control Station Chair, Mr. 24

- Seat and back support upholstery generously dimensioned for high sitting comfort
- Integrated lumbar support height and depth adjustment via ergonomically well situated operating elements on the rear side of the backrest
- Basically with slide seat with sitting depth setting
- Headrest in leather, chromium-plated support
- Seat and backrest move in complete synchrony with the body
- Adaption to different user weights enables individual spring force setting
- Backrest inclination, practically continuous locking
- Constant back support, including with far reclined working position
- Vision height setting protected against dirt by sleeve packet
- Extremely robust armrests for 24-hour use
- Soft castors for hard floors
- GS tested
- British Standard

Technical data

- Sitting depth setting from 400 to 460 mm
- Backrest width and height, 470 x 600 mm

- Seat width and depth, 470 x 400 mm
- Headrest adjustment, 50 mm
- Headrest width and height, 360 x 150 mm
- Similar mechanism dimensioned for a body weight of up to 200 kg
- Backrest inclination up to 32°
- Sitting height setting from 420 to 515 mm
- Armrest height setting from 190 to 300 mm
- Armrest width setting, 2 x 50 mm
- Armrest depth setting, 80 mm

Recaro Guard L Control Station Chair – 24-Hour Chair

- Tilt and height adjustable headrest for relaxed working
- Twin air chamber/pelvic support
- High durability materials, both with the frame structure and with the covering materials (meets highly demanding requirements, as based on car seat designs)
- Armrests can be folded up and tilt adjusted
- Tested for the most extreme load rating
- Backrest inclination can be adjusted with hand wheel operated on both sides
- Extremely comfortable sitting provided by tightly structured upholstery
- High load rating mechanism with cantilever function
- Individual weight adjustment option, (approx. 60 - 130 kg)
- Extra-strong gas spring for height adjustment
- Well-dimensioned base for standing stability (external diameter, 720 mm)
- Adjustable thigh support
- Soft castors for hard floors
- GS tested
- British Standard

Technical data

- Backrest width and height, 432 x 658 mm

- Seat width and depth, 427 x 430 mm
- Width and length of the armrests, 74 x 324 mm
- Headrest height adjustment range, 0 - 80 mm
- Headrest angle adjustment, 0 - 35°

Emerson Network Power is the global technology leader in numerous areas, and a recognized expert in helping to secure business-critical processes, and therefore contributes to “business-critical continuity.” A whole range of the most varied applications, including the tried and tested Knürr rack system solutions and the accompanying thermal management, ensures the required network stability with maximum technological adaptability at the same time.

Knürr system solutions in the world of information and network technology are part of an adaptive architecture from Emerson Network Power, which flexibly adapts to changes concerning security, high-density and all associated capacities. Companies are provided sustainable and long-term benefits from the high IT availability, operative flexibility and impressive reduction in investment and operating costs.

The Knürr Technical Furniture business unit develops, produces and distributes technical workstation systems for control consoles, operation control centers and electronics labs, as well as mobile equipment carriers for the automotive and medical technology industries.

Knürr AG is recognized around the world as one of the leading developers, manufacturers and distributors of rack and enclosure platforms in the indoor and outdoor area, including all relevant active/passive components in 19” construction and the technologies associated with it. Knürr is part of Emerson Network Power.

Knürr is certified in accordance with EN ISO 9001 and EN ISO 14001, and its quality management continuously guarantees the highest standards in all areas of the company.
